ARTICLE INFO

ABSTRACT

Article history: Received: 30/11/2024 Revised: 29/12/2024 Accepted: 31/12/2024	This research looks at the morphological elements of Katy Perry's Prism album lyrics, focusing on derivational and inflectional morphemes. Morphology is a branch of linguistics that focuses on the role of morphemes in language and examines the structure, meaning, and creation of words. With 33 occurrences, the most
<i>Keywords:</i> language Linguistic Morphology Derivation Inflectional	common derivational suffix, according to the data, is -ingly (8 instances), un- (4), -y (3), and -er (2) come after it. Less frequent suffixes, such -ary, -ity, and others, only occur once each. The most frequent prefix is un-, which appears six times, while in-(2) and uni-(1) are less frequent. The most frequent inflectional morphemes are plural forms and past participles, which occur 18 times each, showing how important they are in showing multiplicity and completed actions. Comparative degrees appear 6 times, and the past tense is used 7 times, further indicating the richness of grammatical forms that the album expresses. The results reveal the linguistic diversity of PRISM's song lyrics, which deliver the messages of relationships, self-determination, and living in the present through a harmony of derivational and inflectional processes. This research contributes to our understanding of how morphological elements enhance the literary works and promote vocabulary acquisition through song lyrics.

I. Introduction

According to [1] language is a tool that humans use to communicate and connect with other humans. Language is how humans express themselves or convey messages. Language is required to understand what the goals will be and to transfer thoughts and information, whether verbally or in writing. Language itself is capable of being learned and studied by a branch of study known as linguistics. August Schleicher introduced the expression into linguistics in 1859. According to [1] linguistics and language are inextricably linked, as they are both components of language. Linguistics is the study of language patterns, which include morphology, syntax, phonetics, phonology, semantics, and pragmatics.

Morphology is a study of meaning in a word. According to [2] Morphology often emphasizes dictionaries over comprehending the mental lexicon and word formation. According to [3] as cited in [4] Morphology is an element of language which consists of comprehending words. Morphology is the study of how new words are formed in existing languages. This linguistic branch also studied the words structures, and parts of words such as roots words, stem, derivational and inflectional, according to [5] Derivational and inflectional suffixes are the two categories of suffixes. There are two further groups into which derivativeal suffixes fall. They are both class-changing and class-maintaining derivational suffixes.

Morphemes is the smallest meaning of words that cannot be divided again. According to [6] There are two categories of morphemes: free and bound morphemes. A free morpheme is one that may stand on its own in a language and does not require additional morphemes. Bound morphemes are those that cannot stand alone as a word and must be connected to a free morpheme. A bound morpheme could be found at the beginning, end, middle, or both of a word. The example of free morphemes for instance, cat, walk, happy, jump...etc. Therefore, in bound morphemes there are has derivation and inflection.

Derivational morphemes is a linguistic element that can be added to a base word to form a new one, which often changes its meaning or part of speech. According to [6] derivational morpheme can cause that word's grammatical category or part of speech to change. Examples include "teach" to "teacher" (changing the noun class) and "happy" to "unhappy" (negative meaning).

According to [6] the process of adding an affix to a base word that alters its form in accordance with grammatical rules without altering the term's meaning or class is known as inflection. Inflectional morphemes change a word's tense, case, or number without changing its core meaning; derivational morphemes are different. Class-preserving morphemes enhance meaning without changing class.

Affixes is the structure of derivation that examining the root or the base of the word that changing the meaning with adding affixes features. According to [7] in citated [8] Affixes were classified into three types: prefixes, suffixes, and infixes. Prefixes are the base word which adding the other word into the new with a different meaning, prefixes also can create the opposite meaning, manner, express place also relations of time. Base on (Prefixes - Grammar - Cambridge Dictionary) ,Inter-, mega-, mid-, mis-, non-, ever- out-,post-,pre-, pro-, re-, semi-,sub-,super-,tele-, trans-,ultra-, un-,under-,and up-,. Suffixes is a form/word formation by adding other word into new word that change meaning base on Suffix for instance common suffixes features are -less, -ly, ate, -en, -er, ify, -ize, -able, -al, -ant, -ary, -ate, -ed, -en, -ful, -ic, -ile, -ing, -ish, -istic, -ive, -ily, -place, -ward. Infix Infixes, like prefixes and suffixes, are classified as affixes ("sounds or letters attached to or inserted within a word to produce a derivative word or an inflectional form"). Infixes are uncommon in English, however they can be found in the plural versions of some nouns. Cupful, spoonful, and passerby, for example, can be pluralized as cupsful, spoonsful, and passersby, respectively, by adding the letter "s". Another example is the addition of a (typically unappealing) intensifier to a word, such as "fan-freakin'-tastic." These whole-word insertions are occasionally known as infixes, but the phenomenon is more conventionally recognized as tmesis.

According to [9] The study of the relationship between morphology (word construction) and syntax (phrase and sentence structure) is known as morphosyntax. It looks at how a language's word structure (morphology) affects the way phrases and sentences are put together (syntax). This area of linguistics is essential because it reveals the fundamental ideas guiding the construction of human language by assisting us in comprehending how words and phrases are put together to create sentences in various languages.

According to [10] Inflectional morphemes alter words to convey different grammatical characteristics, whereas derivative morphemes generate new words and alter grammatical categories.

To enhance and enrich vocabulary, language users must study morphology, particularly derivation and inflection. The derivation and inflection may be found not just in everyday discourse, but also in literary works like as poetry, song lyrics, novels, and movies. However, the focus of this study is on the analysis of song lyrics.

Song lyrics are examples of literary works that have significance. Song lyrics include words and phrases that reveal the author's ideas and emotions. Many individuals in this world like listening to songs. Listening to songs is an excellent technique to learn the English language since songs are readily recalled and vocabulary can be taught quickly. A song is a type of music that consists of several lyrics and a melody presented by the musician about what they are feeling and intends to be sung by Katy Perry.

Katy Perry is an American singer, songwriter and television personality. Katy perry is one of the best-selling music artist, over 143 million copies were sold worldwide. Vogue and Rolling Stone have called her the "Queen of Camp" because of her influence on pop music and her campy manner. Katy Perry released the PRISM album on October 18 2013. In this research, researcher choose PRISM as an object because the lyrics is more "mature" and personal. PRISM focuses on the themes of living in the present, relationships, and self-empowerment. PRISM album debuted atop the US Billboard 200 with 286.000 copies sold. The album also charted at number one in Australia, Canada, Ireland, New Zealand, and the United Kingdom. Prism was Perry's fastest-selling album, the second best-selling album in Australia in 2013, and the second highest-selling album published by a woman in the United States in 2013.

II. Method

Qualitative descriptive technique used to describe the study methodology used in the examination of Katy Perry's album "Prism" in terms of morphology, derivation, and inflectional forms. This approach makes it possible to analyze the song lyrics in great detail, paying particular attention to the morphological structures that are used. The process of gathering data includes selecting particular songs from the album that have an extensive range of morphological characteristics. To find and classify morphological phenomena like derivational and inflectional morphemes, the researcher methodically examines these lyrics.

The researchers interact with the lyrics through various interpretations and contextual interpretation, providing as the main tool for data gathering and analysis. This procedure involves recording results in a systematic way. The way researchers do the analysis, researcher find the song from "PRISM" album to analyze then researcher examines the lyrics sources from the internet, then researchers analyze the lyrics by collecting derivational and inflectional in each of the song from the "PRISM" album by Katy Perry. Then researchers calculate all the founding derivational and inflectional from all the song.

III. Results and Discussion

Researchers discovered a range of linguistic characteristics in Katy Perry's "Prism" album lyrics, including derivational and inflectional morphemes. Derivation morphemes, like as prefixes and suffixes, have been seen in phrases like "floating like a butterfly," where the prefix "like" modifies the noun "butterfly" to create a metaphorical expression. Inflectional morphemes, which reflect grammatical function, are found in sentences like "keep my heart beating like a drum," where the verb form remains the same "beating" but has an extra meaning inside the sentence structure. These morphological components significantly contribute to the poetic and metaphorical language employed throughout the album, enhancing its expressive and emotional qualities. These morphemes provide the songs depth and complexity by conveying intricate meanings that deliver.

	DERIVAT		AFI	XES		BASE	
NO	ION WORD	PREFIX	MEANING	SUFFIX	MEANING	WORD	MEANING
1	Quietly (Adv)			-ly	Without making any sound	Quite (Adv)	Emphasize degree or something interesting
2	Politely (Adv)			-ly	In a polite way	Polite (Adj)	Behaving correctly and understanding other people feeling
3	Breaking (N)			-ing	The act of destroy	Break (V)	Stop working by being damage
4	Brushing (Adj)			-ing	Describing the action	Brush (N)	An object with plastic that has a piece of stiff hair
5	Fighter (N)			-er	Person who battle other	Fight (V)	Usage of physical force
6	Dancing (N)			-ing	Activity moving the body to	Dance (V)	Moving the body to music

	(Adj)	deserving respect or admiration			(Adj)	respect or admiration
41	Acceptanc e (N)		-ance	General agreement after something is satisfactory	Accept (V)	Agree to take something
42	Truly (Adv)		-ly	Used to emphasize of something that is true	True (Adj)	Statements that is right and not wrong
43	Carefully (Adv)		-ly	With great attention	Careful (Adj)	Giving attention so you don't make any accident
44	Freezer (N)		-r	Container to store food and beverages at a very cold temperature	Freeze (V)	Cold and its temperature goes below zero Celsius
45	Fairy (N)		-y	Imaginary creature with magic power	Fair (Adj)	Treating someone in a way that is right and reasonable
46	Ending (N)		-ing	The last part of a story	End (N)	Furthest thing from the center
47	Shining (Adj)		-ing	Reflecting light	Shine (V)	To send out and reflect light
48	Sleeping (Adj)		-ing	The state of sleep	Sleep (N)	Resting state of a body which is unconscious
49	Addicted (Adj)		-ed	Unable to stop doing something that is a habit	Addict (N)	A person who cannot stop doing something harmful
50	Cooking (N)		-ing	An activity to prepare food	Cook (V)	A process when you cook some food
51	Japanese (Adj)		-ese	People of Japan or language	Japan (N)	Country in east Asia
52	Drinking (N)		-ing	Activity drinking a alcohol	Drink (N)	When liquid enter the body through the mouth
53	Fasten (V)		-en	To become firmly and fixed together	Fast (Adj)	Moving and happening quickly
54	Questionin g (N)		-ing	The situation when police	Question (N)	A sentence or phrase to find

					ask someone questions		out information
55	Defining (Adj)			-ing	Very important in understandin g something	Define (V)	To say what a meaning of something especially word
56	Concealing (N)			-ing		Conceal (V)	To prevent something from being seen
57	Changing (Adj)			-ing	In a state of becoming different	Change (V)	To exchange similar thing
58	Seasonally (Adv)			-al,-ly	Relate to a particular season of the year	Season (N)	Four period in the year
59	Unzip (V)	Un-	To open something by using zip			Zip (N)	Metal teeth device used for open and close in cloth
60	Unspoken (Adj)	Un-	Not spoken although thought of or felt			Spoken (V)	A meaningful utterance
61	Secretly (Adv)			-ly	Something people don't want to know	Secret (N)	Information that only certain people known
62	Northern (Adj)			-ern	Part of the direction in compass	North (N)	A part of wind direction
63	Lightning (N)			-ing	A bright of light that produce by bad weather	Light (N)	The brightness that come from the sun, fire, etc
64	Deafening (Adj)			-ing	Extremely loud	Deaf (Adj)	Unable to hear
65	Striking (Adj)			-ing	Very unusual or easily notice	Strike (V)	To refuse to continue because of an argument
66	Surviving (Adj)			-ing	Continue to live and exist	Survive (V)	Survive after difficulties
67	Universe (N)	Uni-	Everything that is exist especially all the physical matter including planet, star and galaxy			Verse (N)	Arranging in a short line with regular rhythm

The method of adding affixes to a base word, known as derivation, can alter the term's meaning or class. A word's part of speech or grammatical category may change when a derivational morpheme is added to its base[6]. For example, the words "happiness" and "unhappiness" are derived from "happy," while "arrangement" is derived from "arrange" [6].Based on our finding on table above that has been examined, researchers can conclude that the derivational Suffix -ing is most common with a total of thirty three suffixes, the next is followed by derivational –ly with a total of eight words, whereas derivational –un with a total of 4 words, the next one is-y with a total of 3 words, derivational –er with total of 2 words. For the smallest number of suffixes there are derivational -ary, -ity, -a, -es, -a, -ies, -r, -ed, -ese, -en and -ern with 1 number each. For the findings of derivational prefixes, there is the variable un- with a total of 6 numbers. In- has 2 numbers, while the lowest variable is the derivational uni- with 1 number.

NO	INFLECTED FORMS	CASE	INITIAL WORD	BASE WORD	MEANING IN CONTET
1	Use-d	Past tense	Use	Verb	Past habitual actions
2	Scare-d	Past tense	Scare	Verb	Emotional state
3	Agree-d	Part tense	Agree	Verb	Express approval
4	Stood	Past participle	Stand	Verb	Take a firm stance
5	Held	Past tense	Hold	Verb	Emotionally restrain
6	Loud-er	Comparative Form	Loud	Adjective,Adverb	The singer song voice higher than a lion roar
7	Earn-ed	Past tense	Earn	Verb	The singer fought throught challanges
8	Stripe-s	Plural	Stripe	Noun	More than one line or the singer want to get admire
9	Lover-s	Plural	Lover	Noun	More than one person
10	Close-r	Comparative degree	Close	Verb	Approaching the flower
11	Knew	Past simple	Know	Verb	The singer express something about the past that she saw
12	Ticki-ng	Present participle	Tick	Noun	The urgency because of pressure

Inflectional in this case are identified how frequent the inflectional form meaning usage in this album. Inflectional are transformation word without modifying the root meaning and it does not provide a new term (Fromkin's.2014) as cited in[10]. Inflectional morpheme are affixes that added to a word to indicated aspect of grammatical form such as numbering, tenses, comparative degree and possessive form. After analyze Katy Perry album prism the researchers concludes that the most common inflectional morphemes usage which Plural form with range 18 word in album, moreover past participle on the second position with range 18 formations, in past tense it has 7 word formations and in the last range with rarely appear in katy perry album in inflectional form is comparative degree with only 6 word formations. These inflectional formations are essential for words grammatical functions, meaning of the lyrics and also the singer style for create the unique rhythm.

IV. Conclusion

Distinct word construction patterns are shown by analyzing the derivational suffixes and prefixes in Katy Perry's PRISM album. With 33 appearances, the suffix -ing is the most common derivational suffix and it frequently used to generate nouns that refer to continuous acts or conditions. The suffix -ly appears eight times after -ing, indicating its function in forming adverbs. With totals of 4, 3, and 2 occurrences, respectively, other derivational suffixes such as -un, -y, and - er are less common. The fact that the least prevalent suffixes—like -ary, -ity, -es, and others— appear just once indicates how little they add to the album's vocabulary. The most common prefix, with six occurrences, is un-. Less often occurring prefixes in- and uni- occur twice and once, respectively. The eloquent shapes on the PRISM album also point to the linguistic pattern in the lyrics. While plural forms and past participles are the most used inflectional. These results thus indicate that the linguistic diversity in the album's lyrics is intertwined with emotional depth through a combination of derivational and inflectional morphemes to convey such complex meanings. The variety of morphological structures employed in the lyrics and rhythm of the album lends it a rich language and artistic character.
